# Control structure in c language pdf file generator using excel

The result is a very simple excel worksheet, but you may need to reverse the engineer a more complex version. seems to be more actively updated and documented as well. note that the excellibrary code is the only line at the bottom: /create the dataset and table dataset ds = new DataSet("New DataSet); datatable dt = new DataTable("New\_DataTable); /configure the location for each locale = System. Threading.Thread.CurrentThread. CurrentCulture; dt.Locale = System. Threading. Thread.CurrentThread. CurrentCulture; /open a db connection (in this example with oledb) oledbconnection con = new OleDbConnection(d framework) Tables.Add(dt); /here is the easy part. you can also manually create excel files, but the functionality above is what really impressed me. string pathstring = System. IO.Path.Combine (foldername, rels); System.IO.Directory.CreateDirectory (pathstring); pathstring = System. IO.Path.Combine (foldername, docprops); System. IO.Directory. Create (pathstring); pathstring = System. IO. System.IO.Directory.CreateDirectory (subpathstring); subpathstring = System. IO.Path.Combine (pathstring, spreadsheets); System.IO.Directory.CreateDirectory (subpathstring); // keep the console window open in debugging mode. System. Console. WriteLine("Pressure any key to exit."); System.Console.ReadKey(); bool startxstream (string strline, string strfilename) { write string to a file. // // // .NET Framework 4.7.2 // using System.IO; namespace UpdateWorksheets5 { class Program { static void Main(string[] args) { string xContents = @"a"; string xFilename = @"a"; xFilename = @"C:\Users\david\Desktop\Book3\xlworksheets\sheet1.xml"; xContents = @" index 941 StartExtream(xContents, xFilename); // Keep the console window open in debug mode. System.Console.WriteLine("Press any key to exit."); System.Console.ReadKey(); } } Next, create text files to the XML needed to describe the Excel spreadsheet. You can also use Epplus, which works only for Excel 2007/2010 format files ( .xlsx files). Namespace Makefiles3 {Program Class {Estática Void Main (String [] args) { // // TO-WRITE-TO-TOXT-FILE // .NET Framework 4.7.2 // String FileName = @"C:\Users\David\Desktop\Book3\ \_rels\; fwritetofile (file name); FileName = @"C:\Users\David\Desktop\Book3\ doprops\ App.xml"; fwritetofile (file name); FileName = @"C:\Users\David\Desktop\Book3\ doprops\ core.xml"; fwritetofile (file name); FileName = @"C:\Users\David\Desktop\Book3\ XL\ Rel\ Workbook.xml.rels"; fwritetofile (file name); FileName = @"C:\Users\David\Desktop\Book3\ xl\ Theme1.xml"; fwritetofile (file name); FileName = @"C:\Users\David\Desktop\Book3\ XL\ Worksheets\ Sheet1.xml"; fwritetofile (file name); FileName = @"C:\Users\David\Desktop\Book3\ XL\ Styles.xml"; fwritetofile (file name); FileName = @"C:\Users\David\Desktop\Book3\ xl\ workbook.xml"; fwritetofile (file name); FileName = @"C:\Users\David\Desktop\Book3\ [Content\_Types].xml"; fwritetofile (file name); // Keep the console window open in depuration mode. Using (streamwriter outfile = new streamwriter (string)) { outfile.WriteLine (strline); Return true; } } } Update 2 - This way works almost unchanged except through the ways of the folder in a Mac. Excellibrary still seems to work only for the older excel format ( .xls files), but may be adding future support to new 2007/2010 formats. First, create the structure of the folder as follows the CreateFolderFolder Page {St. St. Void Main () { // // TO-CREATE-O-FILE-OOR-FOLDER // / . What -Text -File // . The necessary XML necessary "lmx.erooc/porPcod"; P edirrevO"/lmx+selyts/lmteehsdaerps. tmemucodecifo-stamroflmxnepo.dnv/noitacilppa"=epyTmetno C "lmx.selyts/lx" P edirecto"/lmx+emeht. tmemucodecifo-stamroflmxnepo.dnv/noitacilppa"=epyTmetno C "lmx.1emeht/emeht/lx" P edirecto"/lmx+teehskrow.lmteehsdaerps. tmemucodecifo-stamroflmxnepo. dnv/noitacilppa" C "lmx.1teehs/teehskrow/lx" P edirecto"/lmx+niam. teehs.lmteehsdaerps. tmemucodecifo-stamroflmxnepo. dnv/noitacilppa" C "lmx.koobkrow/lx" P edirrevO"/lmx/noitacilppa"=epyTmetno C "lmx.
